# about us

## *The Founding...*

After working at several radiology imaging centers across the country, radiologist, Dr. George Elias realized the growing need for reliable, high-quality reading services. In response to this nationwide demand for accurate interpretations of all modalities, coupled with the shortage of quality radiologists in the industry, Dr. Elias founded MRI Diagnostics.

## *Our Promise of Excellence...*

Your patients and their health are our number one priority.

At MRI Diagnostics, we understand that radiologists play a crucial role in guaranteeing an accurate diagnosis in patients and it is this diagnosis which ultimately determines the course of treatment that the patient will undergo.

Therefore, at MRI Diagnostics, all of our radiologists are American board-certified and have each completed a rigorous fellowship training program.

## *Improving your Business...*

MRI Diagnostics provides a complete range of reading services for all modalities including MR, CT, Ultrasound, Nuclear Medicine, and X-Ray. Our reliable services will promote the growth of any imaging facility and will build a trust between the referring clinician and your facility.

At MRI Diagnostics, we are not in the business of running hospitals or imaging centers. Put simply, we are here to provide you with superior quality and reliable reading services to help your company continue to grow and succeed.

# imaging centers

MRI Diagnostics' radiologists and the entire staff go the extra mile when it comes to partnering with imaging centers around the country. We know how competitive this industry has become, and we understand that our readings are an extension of your service.

*Our company provides a turn-key solution that can be utilized by any imaging center at several different capacity levels.*

- Entire account solution – 100% of the modality reads
- Back-up/ vacation
- Specialty reads
- Over reads/ teaching

Our radiologist are comfortable reading all modalities and able to provide expedient interpretations with detailed accuracy. Our clients can expect this type of service regardless of their equipment type or magnet strength. You will never see a suggestion on your report to utilize different kinds of equipment. Those reports actually suggest the need for a different radiologist.

There is no connection fee and no minimum volume requirements. Here at MRI Diagnostics we believe in building long term relationships with our clients and their referring physicians. Clients maintain a relationship with MRI Diagnostics because of our commitment to excellence not because of a large up front monetary investment.

Whether you choose our entire account coverage or simply need a back-up solution for over flow or vacation, MRI Diagnostics will provide you with the service and piece of mind your patients and staff deserve.

# medical staffing companies

MRI Diagnostics currently works with medical staffing companies to provide an additional source of revenue and the ability to become the total staffing solution. Through a strategic alliance with MRI Diagnostics your company can effectively supplement your current services.

*Have you ever had the perfect provider candidate for a long, on-going assignment that just did not work out? Of course you have. At MRI Diagnostics we cannot eliminate this scenario from happening, but we can drastically limit the number of times this occurs.*

- You will never again have to say no to a marriage between a provider and a client because the provider is not proficient in MRI or some other modality.
- Your physician can still cover the facility, providing the on-sight coverage they desperately need. The facilities' MRIs or other modalities will be covered via teleradiology.
- These reads can be covered on a per read basis any day of the week, including weekend days.
- Our IT team will assess your client's ability to connect to MRI Diagnostics. Once connected our fellowship trained radiologists will cover the facility in any capacity deemed necessary by you and the client.

MRI Diagnostics will also allow your qualified LT radiologists to read for accounts using our server and PACS. These physicians once approved by our QA department and signed up to through MRI Diagnostics will then be able to read for past clients that trust their abilities even if the dates for travel do not match up.

We also provide alternative coverage abilities for those accounts that simply are not getting filled. Together we solve the problem of sporadic dates, remote locations, and lack of available candidates. Through our strategic alliance the best radiologists are always available.

With the shortage of radiologists available a permanent candidate can take anywhere from six months to a year. It can be a tough sell to ask for a retainer and then have no guarantees of service provided. Through MRI Diagnostics you can ease the stress of finding a permanent candidate by covering the added work load through teleradiology and including it in the retained search fee.

We understand the staffing industry and can help your company truly become a total staffing solution.

# orthopedic clinics

At MRI Diagnostics we pride ourselves on customizing our services to fit the needs of your facility. We understand that once an orthopedic facility reaches a certain aptitude, many find it necessary and more convenient to begin on-site imaging as well. However, a need for on-site imaging does not necessarily encompass a need for full-time radiology staff. MRI Diagnostics offers a turn-key set-up solution that allows you access to American Board Certified, MRI Fellowship trained radiologists with expertise in orthopedic MRI without sacrificing your payroll.

Unlike many other teleradiology companies out there, we understand that your orthopedic physicians trust us with their patients. That is why we offer direct interactive consults with your orthopedic physicians.

We also make it possible for your orthopedic physicians to view images and reports from their office or home through our Fuji Synapse System.

*Our company provides a turn-key solution that can be utilized by any orthopedic/imaging center at several different capacity levels.*

- Entire account solution – 100% of the modality reads
- Back-up/ vacation
- Specialty reads
- Over reads/ teaching

There is no connection fee and no minimum volume requirements. Here at MRI Diagnostics we believe in building long term relationships with our clients and their orthopedic physicians. Clients maintain a relationship with MRI Diagnostics because of our commitment to excellence not because of a large up front monetary investment.
